

THE STEP BY STEP PROCESS - EASY AS 1-2-3...

## STEP 1: ADJUST

*Adjust and place the Grill Blaster™ BBQ grill cleaner frame to fit your grilling surface completely by overlapping panels as required.*

## STEP 2: LIGHT

*Light your grill following your barbecue manufacturer's instructions and close the BBQ lid.*

## STEP 3: HEAT

*Allow your grill to heat up as usual. The cleaning process takes 10 to 20 minutes depending on the barbecue's BTUs and the amount and type of food residue to be cleaned.*

## STEP 4: REMOVE

*Once majority of smoke dissipates, remove your Grill Blaster™ carefully, using oven gloves (it will be extremely hot). All that's left is to lightly brush away the residual carbon ash.*

### CAUTION! READ BEFORE USE!

All metal parts become hot during use and can cause burns if touched. Use a BBQ or oven mit when using this product. When hot use caution when handling the Grill Blaster™. Keep the Grill Blaster™ away from people, pets and combustible materials.
